SUMMARY

Entry-level Front-End Developer with a passion for artistic design. Good at creating visually appealing web interfaces. Has clear communication and good problem-solving skills. Quick to adapt and eager to learn in fast-paced environments.

SKILLS

- Html
- css
- JavaScript
- Docker

EDUCATION

Atlas

January 2023 - current

Atlas is a 20-month program where I learned the basics of coding and full-stack development. Throughout the course, I acquired skills in various technologies. I also learned how to use Git as a collaboration tool for projects.

The experience at Atlas significantly improved my communication skills and my ability to work effectively with others in team environments

Project

museum of imagination

Worked in a team to complete a front-end project at Atlas, developing a 'surreal cityscape' themed website from scratch. Contributed to HTML coding, animation design, and JavaScript functionality under a tight two-week deadline.

We used html, css, javascript, firebase. The collaborative and challenging project proved to be highly rewarding.

EXPERIENCE

Blues Festival(volunteer)

2012- 2019

- Streamlined the admission process for the festival, especially during times when volunteer staff was limited.
- Utilized my creativity to design and produce posters and signs.
- Demonstrated adaptability by assisting in various areas as needed, effectively managing multiple responsibilities.
- Played a key role in the setup of booths and tents, contributing significantly to the event's layout.

Food Service

July 2020-November 2021

- Handled many different tasks at once because we were short on staff and needed the help.
- Worked quickly and took lots of orders at the same time.
- Made sure to help my co-workers whenever they needed it.
